## Message from Miss Taunt

### Dear Families

Lots of news of new things happening this week.

Firstly, we are delighted that our new SENDCo Mr Cotter will be joining us permanently. He has slotted straight in to our Belmore community and we can already see the changes his expertise and dedication brings.

You may have seen that we are currently recruiting for staff to run an after-school club. We are getting everything in place and will be sharing more with you about this as soon as we can. Watch this space!

Our PTA have been busy planning an Easter raffle for Thursday 27th March. Please bring in your Easter egg donations next week. We are aiming to raise £7,500 to buy a class set of 30 new laptops to be used across the school. We have also just set up an easyfundraising page so you can raise money for the school every time you shop online!

We have parents evening next week and are looking forward to sharing how well your child is doing. We will also have a variety of stalls set up in the conservatory including book fair, school uniform, SATs books, tea and coffee, phonics, free food samples from our kitchen and behaviour advice from Ms Picther, Mr and Mrs Marquis and our NHS Mental Health practitioner will also be there.

We hope you all have a lovely weekend.

## What Parents & Carers Need to Know about ARTIFICIAL INTELLIGENCE (AI) SOLUTIONS

AI solutions are becoming increasingly popular. Trained on vast datasets of text (such as books, articles and websites) in order to learn patterns and relationships, AI solutions can generate text, images, audio, video, code or synthetic data, and can be used for things such as crafting poems or books, creating digital imagery or delivering video content. Recently there's been significant discussion in relation to the benefits and risks of AI solutions, with many undecided on whether it will be a force for good or potentially reduce the need for some job roles.

### WHAT ARE THE RISKS?

- ROOM FOR INACCURACY**  
AI solutions, such as language models, generate their responses purely based on the data they've been trained on, which often comes from sources on the internet. Whilst questions will often illicit relevant responses, if some of the information they've been 'fed' is incorrect, it follows that the answers too may contain factual errors or inaccuracies.
- REINFORCING BIAS**  
AI solutions, such as those generating content or images, can perpetuate existing biases present in the data they were trained, whether through the algorithms written by humans or the content taken from the web. This could easily lead to biased responses and potentially reinforce existing stereotypes, such as those around gender, race or disability.
- IRRELEVANT INFORMATION**  
AI solutions don't have the ability to understand the context or meaning behind a question or a user request. Although highly advanced, the AI relies entirely on the data it's been exposed to and is devoid of independent thought or reasoning, which could lead to irrelevant or even nonsensical responses to queries.
- LACK OF ACCOUNTABILITY**  
Fundamentally, AI solutions are machines or technology programmes that don't have the ability to take responsibility for the responses they generate. This could lead to confusion or misunderstandings in certain cases if the answers are taken as given. For instance, image-generative AIs can lead to output clearly derived from other peoples' content but without any attribution to the original source artist's work.
- STIFLING CREATIVITY**  
One of the potential risks of children and young people continually using AI solutions for things (such as their homework) is that eventually, they might become reliant on it. In the long term, this could potentially impact their development and hamper their ability to think creatively or solve problems independently without the aid of an AI tool.

### Advice for Parents & Carers

- CREATE A SAFE ENVIRONMENT**  
If possible, try to be around when your child uses any type of AI solution and employ content filters to try and reduce the chance of profanity or age-inappropriate subjects appearing in responses. As with any kind of technology, it's important to ensure that children are using AI solutions responsibly and to be there to enable opportunities to discuss their use as part of a safe environment.
- PROMOTE CRITICAL THINKING**  
Explain to your child that AI solutions can be used as one of many tools to help them research and learn, but that they shouldn't simply accept the responses they receive as the truth. Encourage them to question, verify and think critically about the information they get back – all of which apply equally to any website or platform they use.
- DISCUSS BIAS**  
Talk to your child about the potential biases that may be present in the data that AI solutions are trained on, and how these viewpoints might find their way into the responses that AI generates. Again, with many things children might read online, it's healthy for them to consider whether the information is factual and presented fairly.
- ENCOURAGE HUMAN INTERACTION**  
Not only should children supplement any use of software like AI with additional resources such as books and reputable internet sites, but they also should remember what they can learn from interaction with other people. Discussing things with teachers, relatives and friends isn't just an important and often invaluable aspect of learning – it's an essential part of life, too.
- CHECK SCHOOL RULES**  
Make yourself aware of any rules or guidance your child's school might have about the use of AI solutions. Most software is still extremely new, so many schools may not yet have a policy, however, it's important to make sure your child is aware of how to use it appropriately and will be using it for the right reasons.
